The retractable screen that upgrades the everyday

## QUALITY MATERIALS

- North American made
- Sturdy aluminum construction
- Mesh by Phifer®

Mirage is known for making retractable screens that last, and the Mirage 3500 continues this tradition. We achieve our top-quality standards by utilizing the best available raw materials and components, and manufacturing with the utmost precision and care.

## DESIGNED FOR LARGE OPENINGS

- Pairs well with bi-fold and multi-panel sliding doors
- Covers up to 14 ft (28 ft in double configuration)
- Maximum 10 feet in height

Bi-fold or multi-panel sliding doors are amazing for opening up your home. The Mirage 3500 complements these door systems by keeping unwanted debris, insects or harmful UV rays from entering.

With its wide-span coverage, you can enjoy the view without obstructions. The sleek housing tucks discreetly to the side of your door frame so it goes unnoticed when not in use.

## FEATURES THAT MAKE A DIFFERENCE

- Adjustable track stops
- Retained mesh
- Choice of handle

Intelligent design and high quality are the foundation our products are built upon. The features of the Mirage 3500 provide those extra touches to make this a product you will enjoy using.

The adjustable track stops allow you to rest the screen at convenient locations along the track. Retained mesh in our track ensures pets stay in your home.

You can choose from Mirage's standard handle, our easy release *Pivot* Pro handle, or our recessed handle (when clearance is tight).
